

Water scenarios For Copernicus Exploitation

Successful attendance to the **Key Stakeholders Workshop**

We want to thank the **more than 50 participants** that attended the [Key Stakeholders Workshop](#) on 27-28 September. We received very interesting feedback that will enable us to improve the Roadmap and make it more representative of your needs.

We were happy to welcome representatives of the European Commission, Earth Observation, Space and Water agencies at a European and national level, national administrations, and representatives from key sector companies and research centres.

Within the next weeks, we will send a **document with the outcomes of the workshop sessions** to all of the participants. Towards the end of the year, we will have the final version of the Roadmap.

If you still have other comments or observations you want to share with us, we invite you to contact our Project Manager **Carmen Cillero** (carmen.cillero@3edata.es).
